Ubaidullah Ismail

UI/UX Designer

Doha, Qatar | +974 55118227 | ubaidismail378@gmail.com | linkedin.com/in/ubaidismail | Portfolio

Professional Summary

UI/UX Designer with a strong engineering background and 5+ years of experience building web platforms, ERP modules, and e-commerce products. I design user-centered interfaces and workflows, validate them with real users, and take them from wireframe to production code. Comfortable owning the whole product cycle: understanding user needs, prototyping, collaborating with stakeholders, and shipping polished, usable interfaces.

Skills

Design	User research, user flows, wireframing, prototyping, information architecture, usability testing, design systems, responsive design, accessibility basics
Design Tools	Figma, FigJam, Photoshop
Front-End	HTML5, CSS3, JavaScript, Next.js, Tailwind CSS
Tools	Git, Docker, Supabase, Vercel

Experience

System Engineer (ERP UX & Product) *April 2026 – Present*
TNG Group, Doha, Qatar

- Designed and built the inventory management module of the internal ERP, serving 500+ users and 5,000+ items, with a focus on clear workflows and low-friction daily use.
- Replaced manual data entry with RFID scan-based item intake, simplifying a high-frequency task for end users.
- Worked directly with end users to gather feedback, observe real usage, and iterate on interfaces and workflows before and after release.
- Delivered user training and maintained documentation to drive adoption and reduce support requests.
- Continuously improved usability and reliability of ERP screens based on user feedback.

Senior Web App Developer *May 2022 – March 2026*
CloudTach

- Led end-to-end delivery of a career portal, a transportation system, and a pet management system, from requirements gathering, best practices for UI/UX to deployment and launch.
- Translated business requirements into user flows, page structures, and interface layouts for each product.
- Designed the pet management experience around pet records, health management, membership plans, and veterinary-backed articles.
- Ran quarterly reviews with stakeholders to present progress, gather feedback, and align product direction.
- Managed scoping and onboarding to ensure users and clients could adopt new products smoothly.

Web UI Designer *September 2020 – May 2022*
Hashone Creatives

- Built responsive, user-facing Figma to WP websites and web applications turning design concepts into pixel-perfect interfaces.
- Collaborated with cross-functional teams (design, product, development) to deliver projects on schedule.
- Designed and integrated APIs to improve application speed and user experience.

Executive Web Designer *March 2019 – August 2020*
Intersys Ltd

- Converted Figma designs into pixel-perfect, responsive WordPress websites and web apps using custom themes keeping layout, spacing, and typography aligned to the design.
- Built reusable components and templates so designs stayed consistent across pages and were easy for clients to manage.

Education

Bachelor in Business and Information Technology (BBIT) 2019 – 2023
Virtual University of Pakistan
